

PolymerTough™ Lighter Weight Seating Technology by ChurchPlaza

TRADITIONALLY, THE USE OF SOLID WOOD FOUNDATIONS AND T-NUT FASTENING SYSTEMS has represented the very best and most proven application of church seating construction technology. Hundreds of thousands of these chairs have been successfully built, purchased and installed in tens of thousands of churches in recent years. Many churches will intelligently continue to purchase chairs made this way because of their proven durability, comfort and design.

RECENTLY, SOME CHURCHES HAVE SHOWN A PREFERENCE FOR a lighter weight and contour shaped sanctuary chair with a "flex and give" type seat comfort. That is why ChurchPlaza has developed our PolymerTough™ line of very comfortable, ultra-durable and lighter weight quality sanctuary seating to compliment our traditional best sellers.

CHURCHPLAZA HAS PERFECTLY COMBINED THE INNOVATIVE use of sophisticated blow molding technology, space age polymers, plastics and our proven durable fastening systems to produce a line of seating perfect for your church!

THE RESULT IS AN ENTIRELY NEW LINE OF QUALITY CHURCH SEATING WITH MORE STANDARD FOAM, STEEL, UPGRADED OPTIONS AND COMFORT THAN COMPETITIVE FLEX-TYPE CHOICES. Add in ChurchPlaza's competitive pricing, standard upgrades, lifetime Warranty and reputation for trustworthy service and you will understand why you always get more for your money with a ChurchPlaza sanctuary chair!
